

RADAR WATER LEVEL SENSOR

YANTAI RF-RLS

Instrument introduction

- Features: Stable performance, strong ability of anti-interference, unaffected by temperature, humidity or wind force, compact and portable, can be debugged at PC via serial port lower consumption and small beam angle. can work with solar energy system. . UV resistant material.
- Application: Suitable for agricultural irrigation, sewage treatment, water level monitoring in hydrology and water conservancy, urban road and bridge water, etc.
- Measuring range: 0 to 15m
- Accuracy: $\pm 3\text{mm}$
- Process connection: M96*2 Thread/ T shape bracket/

Flange

- Medium temperature: $-40 \sim +80^{\circ}\text{C}$
- Process pressure: ATM
- Resolution: $\pm 1\text{mm}$
- Antenna material: PP
- Frequency: 26GHz
- Signal output: RS485/ Modbus (6 – 24V DC)
- Enclosure: IP68
